

Sunday 05 July Day 96 of the garden project

05/07/2020

Not sure what this grass is called but it certainly has bright flowers on the thinnest of delicate stalks, not good for a windy day like today unfortunately.

Finally a big thank you to everyone who has contributed to the project over the last few months, hope you enjoyed the pictures and that they helped to brighten your days.

Enjoy the rest of the summer, keep safe and well.

Bob Harris

Veronicastrum somehow surviving the constant heavy wind. We're so close to to 100 days! Today is 96. Perhaps we should extend the project for four more.
